PROJECTS

Project 1: **Vanilla Weather Application** | GitHub | Live
This web application allows users to check the weather forecast.
Technologies Used: *JavaScript, HTML/CSS, Bootstrap, API*
- Designed an easy-to-understand-and-use front end using Bootstrap.
- Incorporated API calls into the application, enabling users to check today's weather and forecast.

Project 2: **Magic Fridge** | GitHub | Live
This web application allows users to find recipes based on what they currently have in their fridges.
Technologies Used: *JavaScript, HTML/CSS, JQuery, Webpack & Webpack dev server, Babel, ESlint*
- Worked as part of a team to plan, develop, and implement a web application solution within the required timeframes.
- Designed & developed UI using HTML and CSS, implemented dynamic page elements using JavaScript and JQuery.

Project 3: **Sip 'n Snap** | GitHub | Live
This web application helps people keep track of all their drink purchases.
Technologies Used: *React, JavaScript, HTML/CSS, Firebase, Material UI, Figma*
- Created a React application that tracks a user's spending on drinks, listing out all of a user's purchases, and detailing the name, date, location, and price of purchase. Currently supports user authentication.

Non-technical skills: Pair programming, Agile Project Management, Testing, Chinese (Native Proficiency)
Certification & Training: Online Courses in Front-End Web Development (SheCodes)

EDUCATION

Epicodus   Dec '22

Full-Stack Development   Seattle, WA

- **Coursework:**
  - Introduction to Programming | JavaScript |C# / .NET | REACT

University of Washington   Jun '19

Master of Library and Information Science   Seattle, WA

University of California, Berkeley   May '15

Art Practice   Berkeley, CA

EXPERIENCE

EyeCue Lab   Oct '22 - Dec '22

Software Development Intern   Portland, OR

- Developed a full-stack project with three other interns. It is an application that uses Prisma and PostgreSQL for the backend, node/express for the server, and React for the front end and is written using typescript.
- Learned to meet client needs and balance work between a team of developers with various strengths.

TapRead Webnovel   Sep '19 - Apr '22

Editor   Bellevue, WA

- Recruited promising authors to add their content to our websites, gaining 1.2 Views
- Communicated with authors to improve the quality of stories
